paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 112 Publisher: China Electric Power Press Pub. Date :2009-8-1. The book mainly covers the composition of combined cycle generating units. heating system and main technical performance. pre-test preparation. test boundaries and measurement units parameters. parameter measurement and instrumentation. test conditions and load the benchmark reference state. test processes and operations. the collation of data and unit testing features of the calculated characteristics of combined-cycle correction and evaluation unit. combined-cycle unit performance when the supplier failed division of responsibility. uncertainty analysis test results. test reports. acceptance test data processing and performance calculation example. In order to enable readers to understand the characteristics of the unit operating conditions and the relationship. more in-depth grasp of combined cycle unit features listed in the appendix end of the book curve correction unit. This book is intended in large-scale gas - steam combined cycle power plant design. installation. commissioning. operation. maintenance technicians. management personnel. but also for heat and power class of professional higher education institutions and students for reference. Contents: Preface the main parameters of the symbol sequence and the first chapter remarks angle code section table combined cycle power generation system. the composition of the Section II combined cycle turbine thermal cycle performance of the third quarter with a typical combined cycle turbine system thermal performance of the fourth quarter performance test test-related factors applicable standards in section V Chapter II test unit boundary and the boundary parameter measurement section II test parameter measurement and instrument parameters and measurement instrument sample III Chapter III trial process and operating conditions of Section II preparations agreed to implement Chapter III trials test data management and performance test data processing computing Section II...
