Pages Number: 116 Publisher: Harbin Institute of Technology Press Pub. Date :2009-4-1. Elementary mathematics research in China. both the glorious history by a huge team of modern scholars. therefore. the Chinese elementary mathematics Studies finally published anthology series. this is a very fortunate thing! As we all know. the year 1000 to the early 14th century. was the history of Chinese mathematics. Song golden era. At that time China has been leading the world in mathematics. For example. Horner's Premium seek a technique (China's unique solution of indeterminate equation) and high numerical solution of algebraic equations. the creation of three GuoShouJing interpolation. and Zhu Shijie from Tianyuan technique developed into the Quaternion (equivalent to algebra or equation theory) and other achievements are unmatched by medieval European academia. 1940s. the world history of mathematics into the modern era. and since then. China has experienced a long decline into the world of mathematics started the trend. Especially in the past 30 years. the Chinese mathematics (including mathematics education) have witnessed a series of gratifying sight: In addition to fostering the growth of many in the international mathematical community-and-coming mathematicians. there are tens of thousands of high school and college mathematics teachers. engaged in mathematics education and mathematics creative activities. and work with them on every year on the spread at home and abroad come out of corpus. Of particular mention is modern and contemporary Chinese elementary mathematics researchers have made many joyful results. These results belong to inequality research. indeterminate equation of Study of elementary number theory. combined count Studies. characteristics of conic section and contact Mathematical Olympiad competition theme of and so on. According to insiders of the comprehensive report....
